EVERYTHING OLD IS NEW AGAIN! Recycled Metal Planters

These classic designs are the best of all worlds! The recycled metal helps reduce our need for natural resources. The sturdy containers allow you to grow flowers and vegetables on patios or in small yards. And the retro design is a nostalgic reminder of good times. It's a great way to feel good and give back to the planet.

VICTORY GARDENS

Grow delicious food the easy way with sturdy container gardens.

Good for you... good for your family... good for America!

Of all the celebrated nostalgic markers of our World Wars, few are as memorable as America's Victory Gardens. Twenty million Americans answered the call, all in the name of patriotism. Gardening was a family and community event, producing over 9 million tons of fresh vegetables. As commercial canned goods were directed to the war effort and supporting our troops, the contributions of Americans, young and old, made a huge contribution to the war effort.

Today as we travel through supply chain shortages and increasing costs, our gardens are so very important to our everyday lives. They provide healthy exercise, stretch the food budget, provide fresh and nutritious products, create a feeling of accomplishment and improve our quality of life.

Container gardening is an increasingly popular way for home gardeners to grow their favorite vegetables, especially when gardening space is limited. Garden Gallery is proud to manufacture a complete line of Victory Garden containers, manufactured with recycled metal. Drop by our store, email us at info@gardengalleryironworks.net or give us a call and "Let's Chat About Your Garden!"

Handsome Iron Obelisks

A classic architectural style that creates interest and structure.

Tall, linear, and stately, the obelisk is a symbol used throughout the world. (The Washington Monument is a noted example.) Its form exudes strength and stature, establishing a focal point for everything that surrounds it. In the landscape, these impressive designs create interest and a sense of uniformity, an eye-catching monolith that pleases and inspires. CINCH TRAPS

www.gardengalleryironworks.net 1-800-452-5266

GOPHER CONTROL

Named for external fur lined cheek pouches for carrying vegetative matter, also a burrowing animal with soft and glossy body hair, inconspicuous ears, with large upper and lower incisors, they vary by species in size from 6" - 13". Excavated crescent shaped mounds produced while tunneling for succulent portions of plants. Active year round, solitary and defensive. They can control territory up to 2,000 square feet.

MOLE CONTROL

Moles have velvet blue-black to gray mohair-like fur. A slender snout, needle like teeth, with flattened feet and claws, and inconspicuous ears. They can grow from 6" - 12" long depending on species. They build vast underground tunnels in search for worms, insects, and living space. Their tunnels, often shared, usually average 6" below the earth's surface. They form conical mounds with a hole near the center of the mound.
